- New tags to be used in the scheduled transactions description <MONTH> <YEAR>
- sales-return transactions may now be printed on the slip printer, just like quick-invoices
- in the Sales Invoice printout, you may now hide the quantity and the unit-price columns, in case your invoice contains only service items, with a quantity of 1 for each.
- Search, in the Review and Reprint forms, now searches in the descriptive memos of transactions too
- report "List of Unpaid Invoices", new option to print auxiliaries due balance

Payroll:

- new Payroll Report Generator, similar to Bordereau, with multiple saved layouts. Sold separately.
- report "List of Employees Salaries", new options:
 - List of salaries of employees over retirement age
 - List of salaries of foreigner employees
 - List of salaries of foreigner employees treated as natives
- report to print the details of employees attendance

Fixed-Assets:

- Fixed-Assets depreciation at end-of-period now generates one single voucher for each group of items, instead of one voucher per item

Releases of July 2004

System:

- pictures storage is now outside master files, as separate image files. The advantages:
 - the size of pictures files is no longer prohibitive, and does not impact performance
 - you may exclude pictures files during backup
 - many items may point to the same picture, without duplicating the storage

Scheduler:

- modification of a scheduled transactions: can be applied to all other related scheduled transactions, i.e. in the same series

Stock:

- in most stock-transactions editors, the wizard may now fill the transaction with all the items available in a specific warehouse
- allocation on sales invoice is now active
- Stock-Items code length is now 20 characters, instead of 16.

Payroll:

- Time-Attendance import, option to import only records between a date range
- report Bordereau: new option to separate extra month from the regular months

EPL:

- EPL, new syntax may now provide the balance or the movement of an account, for all available companies. This feature is needed when building holdings consolidation reports. See latest EPL manual.

FollowUp:

- Follow-Up module, new detailed reports

AutoCopy:

- AutoCopy now takes into consideration cheques transactions too

Releases of June 2004

All Transactions:

- new property, per company, to define how the date of the next transaction is computed. New transaction may assume current working date, or same date of last transaction of the same type.
- in the transactions editors, implementation of the "smart name" of auxiliary accounts, which is a combination of the administrative name (i.e. the name of the administrative father account) + the name of the account itself.

Accounting:

- Statement of Account may now be issued by value date. Future transactions are included as a separate subsequent section
- Statement of Account printout has now a smart, dynamic and automatic adjustment of the width of its columns, according to contents.

Stock:

- in the Sales Invoice editor, stock-items unit prices could be automatically derived either from a valid proforma, or a previous invoice.
- Stock-Transfers, new button in the review and reprint form, to issue invoices based on pending items that are delivered and not yet invoiced.
- Price List: more options in printing prices v/s discounts, v/s VAT.
- new report: "Sales Prices Control"
- new report "Purchase Turnover per Department"
- Stock Report Generator, new properties in scoping

- capability to analyze and accept data generated from many brands of time-attendance equipments.

Human Resources:

- new Human Resources module (module is optional, and sold separately)

Releases of April 2004

All Transactions:

- on all transactions printouts, the printing of a signature-box is now optional. If your printing paper includes a signature area, with NCR duplication capability, you may ask PIMS2 not to print its own signature-box.

Accounting:

- for automatically generated transactions, the assignment of a Legal Number is now optional. Typical automatically generated transactions are: fixed-assets depreciation transactions, end-of-period closing vouchers.
- Auxiliary Accounts: optional auto-serialization of auxiliaries codes upon creation
- in accounting vouchers "Review and Reprint" form, new search, by last operator. The "last operator" is the operator who did the last modification on the transaction. If the transaction was never modified, then it is the same as the initial author of the transaction.
- report "Profit & Loss", printout of opening column is now optional
- report "List of Auxiliaries", can be now sorted by name

Stock:

- in the Sales Invoice editor, option to propose the net discounted unit price, instead of a unit price and a discount separately. This setting is for each Auxiliary, individually.
- in the Purchase editor, the Purchase expenses panel shows the percentage of each expense, and total percentage of expenses
- the balance of Auxiliary displayed in invoice editor and delivery editor: includes value of stock delivered and not yet invoiced, counted at regular prices applicable to the considered Auxiliary. It is this balance which is compared against the credit ceiling of the Auxiliary account.
- in the Sales Invoice printout, option to print a list of unpaid invoices for this client
- service items may now be included in Delivery and Reception transactions
- report "Salesman Turnover", new option to "include transactions with no specific salesman"
- report "Stock Report Generator", new item exported": Usual Supplier of stock-item

Production:

Fixed-Assets:

- wizard to create or duplicate multiple Fixed-Assets items
- Fixed Assets depreciation generation upon startup is now optional, since it may take a long time
- Fixed-Assets items now have a Warranty Date. A new report shows those warranty dates.

Payroll:

- Pay-Items value may now be a percentage of hourly salary
- Pay-Items value may now be a percentage of daily salary
- Pay-Items may now apply conditionally, based on the existence of specific family members.
- Type-of-Contract now has a "Ceiling for Overtime Hours". Hours worked in excess of the ceiling are disregarded
- Type-of-Contract now has user-defined. a "Number of Days per Year", used for prorata calculation, PIMS2 used to assume a constant of 365 days per year.

EPL:

- EPL, new syntax may now provide information about a currency. See latest EPL manual.

[end of list]
